

# Desk booking solution for dynamic work environments

Empower your employees to quickly find a desk that meets their needs and get more out of your workspace.

### **Enable agile working**

Offer your staff flexibility to choose a workspace, enabling access to different desks for different activities.

### **Reduce real estate costs**

Optimize your costs by maximizing the use of workspace and never waste space on empty desks.

### **Adapt to a modern way of work**

Implement a simple solution for challenges like the growing numbers of remote employees or staff that spend just a part of time at their desks.

### **Improve workplace satisfaction**

Enable people to choose location, floor, room, desk equipment by having a clear overview on all details, in one place.

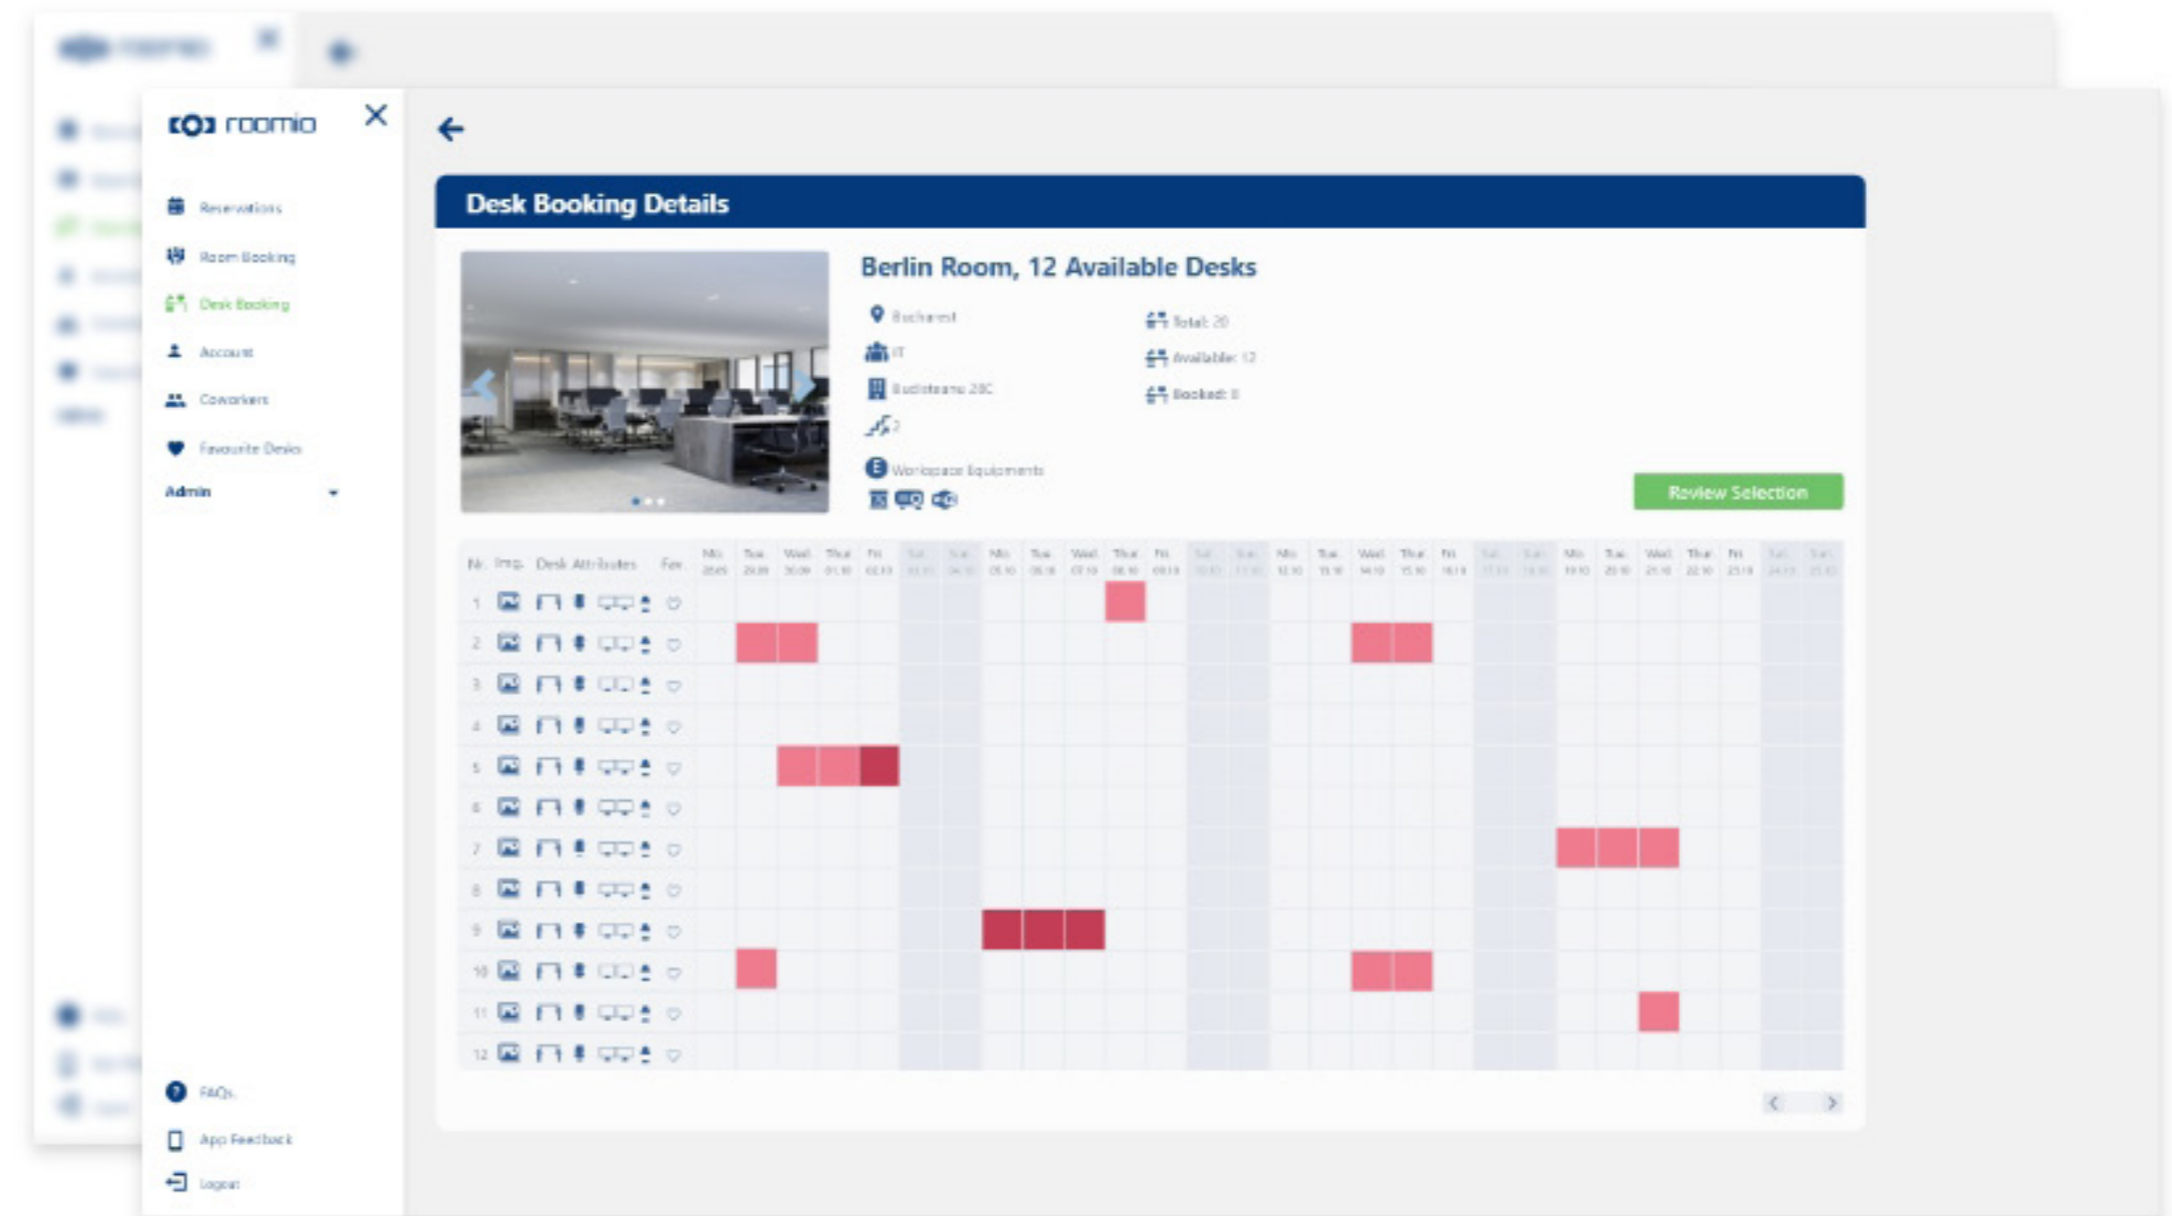

## The value of roomio desk

roomio desk helps companies to optimize space management, providing insights on how the space is used, if there are too many desks or too few, or where to make changes - based on usage trends.

Our app balances easy, efficient workspace management with employees' satisfaction to have an appropriate place to work when needed.

## Book the right desk easily and efficiently

roomio desk has a friendly interface that helps employees to easily book a workstation, from anywhere, using a web interface. After selecting the desired location, available desks can be checked at a glance. Users have the possibility to filter options depending on personal needs: light, desk endowments: calibrated monitors, mouse, stationery, visitors chair available, etc. One more click and the desk is booked!

### Seating Plan

## Room's overview

Users can visualize the room's plan to understand exactly where a workstation is located, if the desks next to it are booked or still available, how close is the entrance and other details.

roomio desk enables your teams to work more efficiently in a shared workspace.

Choose our software-as-a-service or opt for an in-house hosted solution.
