

Digital display for meeting and conference rooms

Implement simple solutions for challenges like the growing numbers of remote employees.

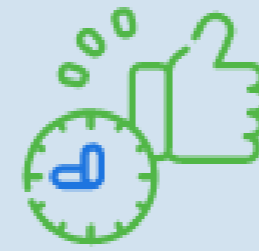

No Industry Limits

Can be used for office buildings, conference venues, hotels, hospitals, universities, hubs, etc. It's easy to adapt to companies and visitors' needs.

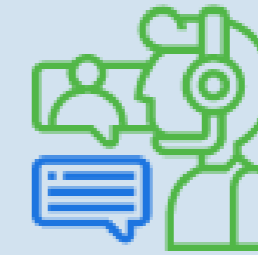

Smooth User Experience

roomio is simple to use:
- friendly interface for meeting/ conference organizers;
- adventures with finding the right room and delays end for your visitors/ guests/ conference attendees.

Efficient Meetings and Events

Either it's a brainstorming, a meeting, or a presentation, the daily meetings are no longer disturbed by persons eager to know what happens inside. Digital signage answers this curiosity.

Customer Support

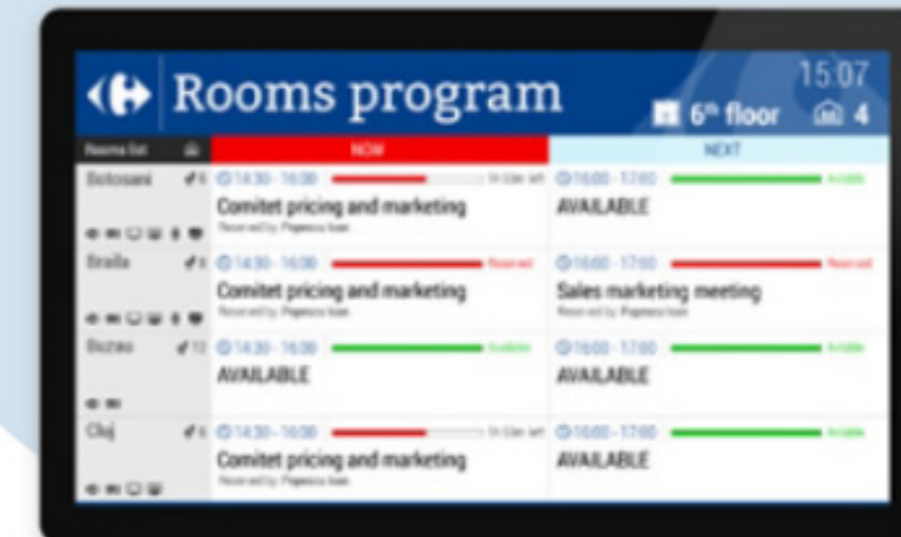

If any information is needed, or something goes wrong, our support team is here to guide and to help you.

Simple, Easy, Efficient

Organizing a meeting is **simple** with roomio: check the availability, number of seats and in-room equipment of the shared spaces, then add a meeting in the calendar, just as usual, because roomio is synchronized with your calendar system.

Finding the meeting room is **easy**, as all locations are clearly described in the app (including building, floor, etc). Moreover, assignment plans are automatically and immediately transferred to the display at the rooms' entrance, on electronic signage and interactive panels. Guests and meeting attendees will see the current status and upcoming meetings.

Adjusting logistical details of shared spaces is **efficient**, based on reports and insights from roomio. The app can offer any type of information regarding usage of the meeting rooms, how office resources are exploited and what are the real needs - all based on data.

Step by step planning

roomio is synchronized with your calendar system, allowing you to organize your meetings as you usually do. If roomio is used autonomously, then you will follow 3 simple steps.

- 1 Log - In**
The meeting organizer logs in using roomio management interface from any device - even on the go.
- 2 Creating Appointments**
The organizer checks room availability, in-room equipment, number of seats, then selects an appropriate room and the needed time-frame.
- 3 Room Allocation**
After room selection and assignment of an appointment, the new reservation is shown immediately, directly on the room entrance display and the overview display in the lobby.

Hardware

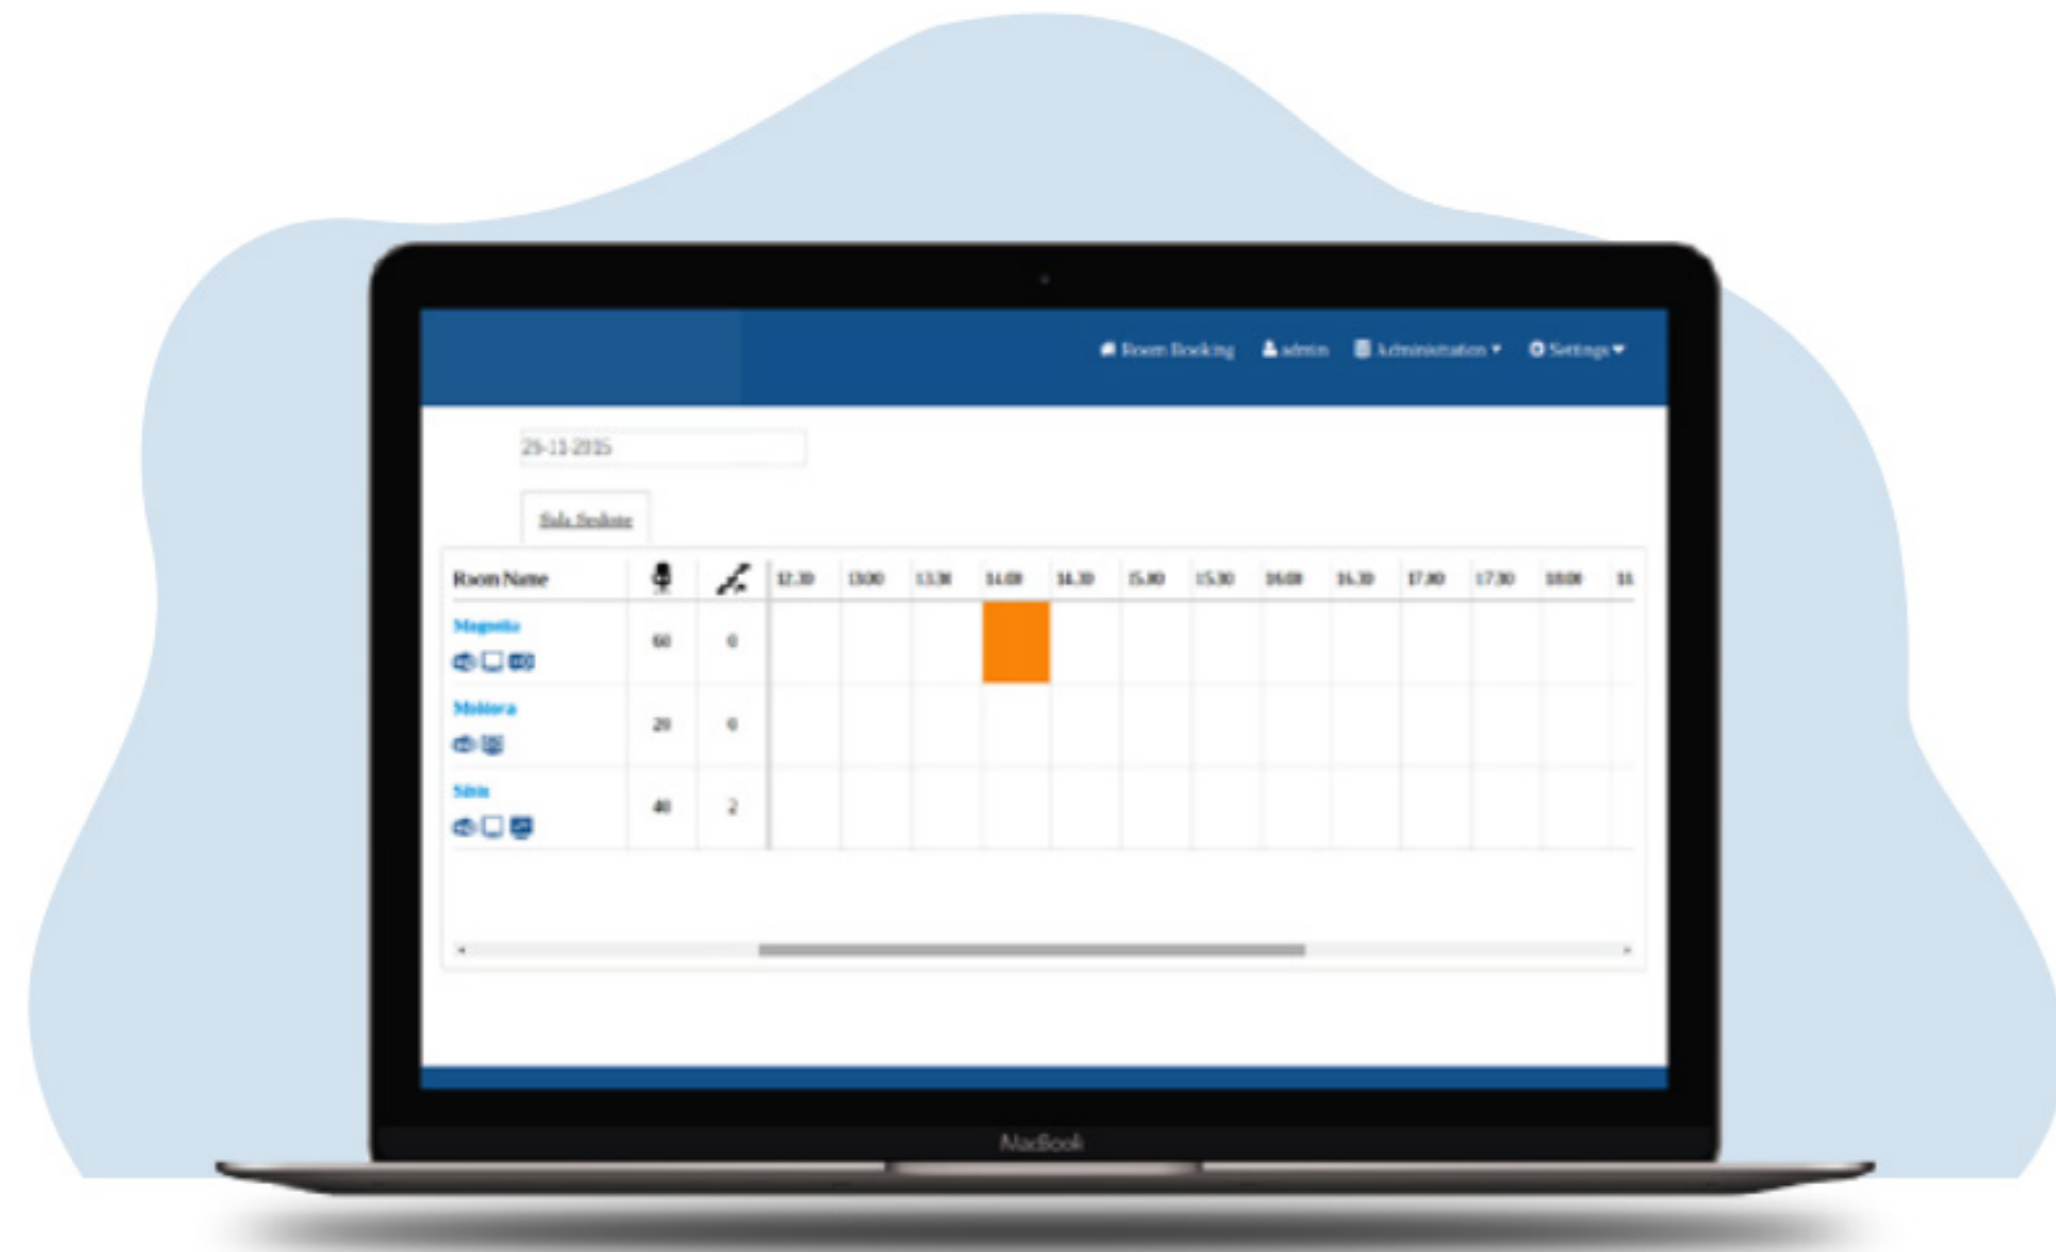

Extensive Hardware Capability

Integrates seamlessly with digital signage solutions from Samsung and other manufacturers.

Display on Any Screen

Supports a variety of display devices, as well as tablets, and smartphones.

Usage and Back-end Features

Control Center via Web

The administration is carried out via any web-enabled device, whether laptop, tablet or smartphone.

Centralized Availability View

The meetings / events organizers have access to a centralized dashboard where they can view, in an easy-to-follow manner, the schedule, rooms' status (available / reserved), who made the reservations.

Calendar Integration

roomio automatically synchronizes data from calendar systems such as Microsoft Exchange, G Suite or specialized systems such VerA.web.

Display - Features

Digital Signage

See meeting details directly at the meeting room door. Option to display a program overview of multiple rooms.

Real-Time Display

Immediate display of changes in program or appointment assignments.

Room Status

Intuitive indication of room status, by colors: red - occupied room, green - available space.

Booking at the Room

Touch screen devices allow you to book a room or to modify a meeting directly in front of the door, with just two clicks or using NFC.

Check Agenda

Guests can check when a specific meeting starts, check occupancy, or scroll through the agenda of a day, directly on the display in front of the room.

Extend Meetings

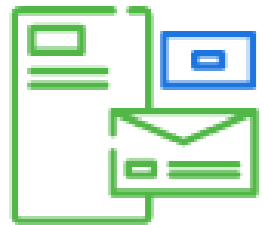

If you need more time for a meeting, you can extend it right from the device at the room entrance.

Moreover

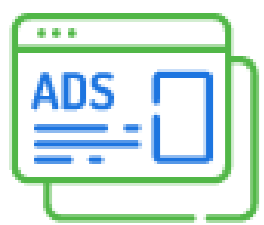

Stats and Reports

Get insights about room usage and booking behavior; adapt room features to people needs.

Branding

Add company logo, adjust colors, fonts, visuals, and videos to fit your company branding.

Advertising

roomio allows advertising (images, video, text) intended for visitors, or for internal communication.

Our Customers and Partners

roomio is used throughout Europe by customers and partners, both companies and hotels or venues. Together with digital signage partners we offer integrated packages that provide our customers a complete solution with hardware and software integration.
